

**AIA**  
Albuquerque

*Energy Code Updates: What to Expect*  
REGISTRATION FORM 4 HSW

**COURSE DESCRIPTION:**

This course will inform attendees of the upcoming commercial energy code changes, using ASHRAE Standard 90.1-2010 and 2013 comparisons to illustrate major changes. A review of both performance and prescriptive measures will be covered, as well as specific compliance options for new code requirements. A discussion related to impacts to both project capital costs and project architect roles will also be covered.

**LEARNING OBJECTIVES:**

1. Attendees will understand upcoming significant energy code updates related to mechanical, electrical, plumbing, and architectural systems.
2. Attendees will be able to determine whether a performance or prescriptive approach makes the most sense for code-compliance, and resources for the performance path approach.
3. Attendees will understand techniques to address new code requirements for building systems, as well as exceptions to code sections.

Attendees will understand the basis of ASHRAE Standards 90.1 2010 and 2013.

DATE: June 16, 2017
