

ARCHITECT WANTED

My partner and I need an architect to help us get permits from the city of Albuquerque.

The project is a 4,800 sf metal building that will be an automotive hobby shop for two guys. We will not be running a business. We already have the building with drawings from the manufacturer. We have foundation drawings and a survey of the property.

The property is owned by us. Address is 601 Aspen NW in the city of Albuquerque. Zoning is NRLM.

Please contact either of us so we may discuss this project.
